Project Reference

Basement Partial Waterproofing

Boyle, Co. Roscommon

Description

Extensive renovations were undertaken to covert this well-known shop at Bridge Street, Boyle, Co Roscommon.

The street name gives a clue to some of the difficulties encountered during the renovations.

Because of the high ground at the rear of the structure and the amount of water present a system where the water could be controlled was devised and completed by SURFASOLOGY application crew.

These works included the formation of a collection-sump in the floor and remedial works using Maxrite 500, Concreseal 5, Maxplug and Maxseal Flex to control the volume of water and divert it into the collection-sump where it could be pumped away.

All products supplied by SURFASOLOGY for this project are fully tested and approved.
