

Citrex

What is Citrex:

Citrex is an orange citrus-based heavy duty degreasing solution used to remove grease, oils and dirt from concrete surfaces.

Specification Tip for Design Professionals:

Citrex may be specified by name or by using the following description: an orange citrus-based heavy duty degreasing solution used to remove grease, oils and dirt from concrete surfaces.

- Removes oil and grease accumulations
- Pleasant citrus odour
- Concentrated for economy and ease of use

How does Citrex work:

The Citrex solution penetrates deeply into the contaminants and dissolves making them simple to remove.

Mixing dosages:

Citrex is used un-diluted to remove heavy deposits, and for general everyday cleaning dilute Citrex with 5 parts clean water.

How do I prepare the surface before applying Citrex:

Complete a small test area to ensure the product is suitability for use.

Using clean water wet the perimeter of the contaminated area to prevent run-off from the dissolved contaminants.

How do I apply Citrex :

Use protective gloves and goggles when using the product. Do not use in the presence of foodstuffs.

- Using a soft brush apply Citrex to the area at the rate of 1litre per m² on the contaminated area allowing the solution to soak into the surface for between 2 and 10 minutes.
- Using a stiff brush scrub the contaminants.
- Flush the area with clean water and vacuum to remove the contaminants.

When using Citrex as part of an ongoing cleaning programme dilute the Citrex with 5 parts clean water.

Dispose of the waste in accordance with the Local Authority Regulations.

Citrex should not be applied externally if temperatures are below 10° C or if rain is expected in the following 24 hours.

For further information on application of the material please contact our Technical Department.

Cleaning:

Equipment should be washed immediately with clean water.

Citrex

Packaging:

Citrex is packed in 1ltr, 5ltr and 25ltr units.

Storage:

Citrex should be stored in its original manufacturers containers in dry conditions above 5°C and protected from frost.

About SURFASOLOGY™- The Science of Surfaces

SURFASOLOGY™ is here to make products that work for you and the environment.

At SURFASOLOGY™ we believe that time is our greatest treasure so we try to ensure that you do not waste it. Our products are so good that you have to use them once leaving you free to enjoy life to the most.

Our mission is to make the world a better place, one surface at a time!

Disclaimer:

The general information provided in the present technical description, application guidelines and other recommendations, is based on research and experience. However the client is obliged to determine himself what products are suitable for use. Accordingly, no liability will be accepted by SURFASOLOGY™ (IBC Limited).
